Also regular support and upgrades for life-time.

Who we are?

We are the team of ERP professionals committed to support the manufacturing industries in their smooth transition of ERP journey.

Why ERP projects fail?

- Too much of customisation
- Too long for implementation
- Too costly
- Lack of Change Management

Though ERP as a subject is very old, unfortunately not many ERPs are industry ready. So it calls for in large team for customisation. This process makes both the system and adoption costly and inefficient.

Syscon is a Plug & Play ERP system with features pre-built and configurable.

Plug & Play - ERP

ERP is the foundation of the
Manufacturing Industry's
"Digital Transformation".

Next steps...
